Weighing Products & Software

Advance Weighing Solution

KantaKing Advance Weighing Solution Software is a leading weighbridge interface software application used in highly complex industrial inventory and production management requirements with Advance anti-theft weighing solution with GST integration along with CCTV integration.
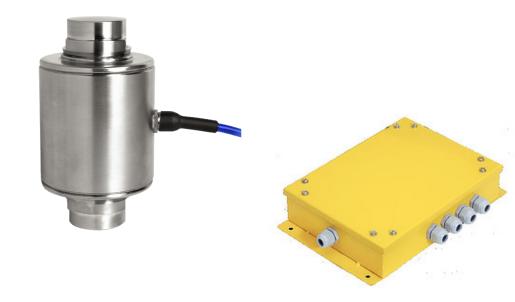

Software Features :

- Weight Transaction:First Weight, Second Weight, Manual Weight(only Tare weight) and Duplicate receipt/slip
- Software is fully secure because admin can create any number of users and give then different permissions to make selected work / transaction in software.
- India's first Weighing software where we can run software continuously for many years by making financial year and setting slip number 1 and the data will can be stored in software without any problem just like Tally or Busy Software.
- India's first Weighing software that can be used as cashless. Cash / Credit / Prepaid Card
- Auto SMS to Party/Supplier/Owner.
- Software is fully GST integrated in all financial transaction as well as GST Reports.
- Option in software select party whose GST details to be print on slip so that party can get input credit.
- Software gives a separate report (B2B) for these transactions.
- Option in software to select GST party and make the transaction with basic amount in slip, software will give a provisional slip number and later we can make a consolidate GST bill for all provisional slips

Software Reports:

- Daily Report/Date wise
- Shift Report
- Cashier Report
- Material wise/ party wise/ vehicle wise
- GST Report : Complete/B2B/B2C
- Prepaid card summary report
- Cash/card transaction transfer report
- Bill cancel report
- Wrong vehicle (doubtable) entry
- Auto Email to the owner(In PDF Format)

- **Industrial Automation Solutions**
- **Public Weighbridge**
- **Logistics Process Automation**

Auto Email in PDF Format

- Software will send Emails automatically on real time as the transaction occurs.
- Mails include all weight transaction with vehicle images captured by camera/s at weighbridge and daily reports at a predefined time.
- During 1st weighment (tare weight) 1 image will be sent through mail along with transaction details & while 2nd weighment (gross weight) 2 images will be sent through mail.
- Images will be in PDF format so it can be viewed on mobile also.

PLC Based External Display

- External LED Weight Display is integrated with our Software.
- Information and Display size as per client requirement.

CCTV Integration

- System will capture the photo of vehicle from camera/s and show in software screen at the time of doing weigh transaction.
- Operator can validate/ check the vehicle number, whether driver is Off the vehicle etc. without moving from his / her seat.
- This image/s will be saved along with weight transaction details in the secured system and can be viewed with details later at any time by entering password.
- System has an option to print or view image for any transaction later at any time.
